# Job Opportunities 04 09 2010

## This list will be phasing out in favor of www.ldsjobs.org. Please keep sending me any job opportunities you are aware of so I can get them onto the site.

**The link below is to a list of many jobs with The US Dept. of Health & Human Services in** Denver.  A quote from the supplier of the information is below as well.

The Depart of Health and Human Services is moving fast on hiring for health reform.  Below is a link for Denver only jobs.  You do not need to be in health care to apply. Most of these are administrative jobs.

These jobs are under Direct Hire authority...which means they can hire anyone who meets the requirements of the posting...they really don't have to interview (and they don't have to interview all applicants if they do interview).  Direct hire is infrequent so this is a good thing.  They will send the applications received on to the selecting official on a flow basis...they will not wait for the posting to close on April 30th.  If you are interested, do it soon.  All federal jobs are applied for thru USA Jobs.  It is easy to create an online resume in USA Jobs (you have to) and you can cut and paste  sections of your current resume if you have it electronic.

http://jobsearch.usajobs.gov/search.aspx?jbf574=HE70%2CHER7&brd=3876&vw=d&ss=0&jbf573=15510%2C15512%2C15514%2C15515%2C15516%2C15523%2C15669%2C29555%2C29556%2C45575&FedPub=Y&FedEmp=N&pg=1&where=denver%2C%20co&rad=0&rad_units=miles&re=0

**Shareholder Representative Services is a professional shareholder representative.**

As shareholder representative, SRS professionally manages the entire post-closing process including the management of escrows, earn-out negotiations, the handling of claims, disputes and litigation, communications with the acquirer, and, ultimately, distribution of escrow funds. We are in the process of expanding our Denver based operations group and are looking for a junior level data analyst/accountant and a customer support analyst. The salary for each positions will be approximately $40,000 - $45,000 d/o/e. The detailed job descriptions and requirements are attached.

Please send your resume and cover letter to careers@shareholderrep.com and include Lew's list and the position you are interested in the subject line.

Thank you.   http://www.shareholderrep.com

## SR. TEST & INTEGRATION ENGINEER

**Full -Time Exempt**
**Rank: Firm**
**Hiring Manager: N. BOZZOLO**
**Bonus Value: $500.00**
**Post Date: 2010-4-9**
**Location: Boulder, Co.**
**Responsibilities**: Work will be performed at Boulder, CO in support of NASA Goddard Space Flight Center serving as a liaison and monitoring the efforts of instrument developer. Candidate shall oversee the operations required in the test and integration of optical, electronic, electromechanical, and thermal systems. Shall provide the technical expertise to assess instrument developer in the test and integration of optical, thermal, electronic, and electromechanical systems and subsystems in response to task requirements. This includes the design, fabrication, and operation of ground support equipment (both electronic GSE, and mechanical test fixtures), the design of test sequences, the specification of pass/fail criteria, and the generation of test procedures. This position requires expertise in determining test methodologies, specifying the instrumentation (e.g. accelerometers, thermistors), and test equipment necessary for test, directing the test, and subsequently analyzing the resulting data (statistically, in the time and frequency domain) and preparing summary reports. This requires expertise in operation of various test equipment, and instrumentation sensors, and in the manipulation and processing of resultant data. Tests will often involve measuring system or subsystem performance over temperature, and in the presence of a disturbance environment. Candidate shall review and supervise integration and test efforts conducted by the developer and report to the GSFC team on outcomes, malfunctions and anomalies.

**Requirements**: This position requires a minimum of 10 years experience in the test and integration of space flight optical, mechanical, electronic, electromechanical, and thermal systems. This experience should include hands-on work with flight hardware at all stages of development, design, build, test, qualification, and on-orbit operation. This position also requires expertise in the collection, manipulation and interpretation of test data

# IT Data Analyst

The IT Data Analyst will be responsible for the coordination and administration of business data loading, extraction, analysis and reporting from various business applications, primarily Oracle E-Business Suite (ERP). In addition this position will help define and provide SharePoint solutions to the Dot Hill Systems business community. This individual will document and support the structure of the SharePoint content management systems currently in use at Dot Hill Systems, be the main Administrator of Sharepoint sites and monitor adherence to content guidelines.

**Essential Duties and Responsibilities:**
- Preparation and entry of Operations business data into Oracle – this includes Demand Forecast, Supply Planning and Parts Characterization.

- Troubleshoot Business data and information related issues
- Key player in continual improvement of process, process documentation, data and tools
- Manage the creation and use of SharePoint sites, their layout (look and feel), structure, content and monitor sites for adherence to standards
- Play a key role in the development, implementation and support of the SharePoint governance policies
- Develop, support and document effective business processes necessary for the operation of the company's SharePoint environment.
- Provide SharePoint training to individuals or groups and build a broader SharePoint community of experts throughout the company to ensure a unified effort.
- Coordinate all IT specific activities related to the successful and effective operation of the SharePoint environment

**Required Qualifications:**
- Team player with a strong desire to continue learning and expanding their knowledge in a fast-paced, deadline-driven environment
- Strong analytical, pattern detection and problem solving abilities
- Demonstrated expertise with MS Excel, Word, PowerPoint, Project, etc.
- Comfortable working with all levels of the organization
- Ability to multi-task with creative thinking and "do what it takes" attitude
- Strong communication skills (written, verbal and presentation)
- Self Starter and quick learner who is comfortable working in a fast paced environment with minimal supervision

**Education and/or Experience Required:**
- 2+ years extensive experience with analysis, evaluation, implementation and support of Microsoft Office SharePoint Server 2003 and 2007
- 2+ years of experience as an analyst or equivalent supporting global manufacturing & operations organizations
- Experience with Oracle E-Business Suite a strong plus
- Experience with Agile PLM and integration to Oracle ERP a plus
- Bachelor's degree in Computer Science, Business (or equivalent experience in a closely related field)

Dot Hill offers a comprehensive compensation package and a great team-oriented work environment. If you are looking for a challenging career opportunity, please send your resume and cover letter to: **apply@dothill.com**

## Change Analyst

Monitors, assists and supports in the compliance to all aspects of the Change Control process.

**Essential Duties and Responsibilities:**

Responsible for compliance to the Engineering Change Order (ECO) process. Responsible for implementation of part number assignment and process. Supporting the introduction and change

control of Parts and Product structures into the Agile and Oracle databases. This is an interface position between Operations, Program Management, Development Engineering, Suppliers and Customers. This position will require the ability and experience in the implementation of Configure to Order, Top Level Assembly and Field Replaceable Bills of Materials in Oracle and Agile databases.

1. **Performs Configuration Management for products. This includes but is not limited to:**
   - Recommending and preparing changes which will facilitate pre production and transition to production in manufacturing.
   - Working with development and operations engineers to transition product from engineering to production.
   - Recommending and preparing changes which will facilitate required changes to sustaining products in the factories.
   - Overseeing the maintenance of records and reporting systems for coordination of all assigned products.
   - Determining best approach to configure products, including subassemblies or final products.
   - Attend Program and Product meetings for information and action items.
   - Direct interface with Customers to ensure all requirements are met in final configurations of products.

2. **Manages the Engineering Change Order (ECO) and Manufacturing Change Order (MCO) process. This includes but is not limited to:**
   - Implementing and administering ECOs and MCOs in Oracle and the PDM system (Agile).
   - Ensuring that master drawing files and history files are accurately maintained and are current.
   - Ensuring that effective control is maintained over drawings, files and other engineering, manufacturing and product data.
   - Maintaining logs and records which accurately reflect status of ECOs/ programs/projects/tasks.
   - Working with Project and Program Engineers and Managers to modify designs, if necessary (drawings, BOMs, documents, etc.).
   - Channeling ECOs to appropriate Engineering/support personnel for work and then facilitating approval of completed ECO packages.
   - Identifying affected documentation and ensuring revisions incorporated into ECO packages, as required.
   - Managing process to meet specified deadlines.
   - Ensuring that effectivity and cost considerations are properly reviewed and documented.

3. **Responsible for assigning support for and managing the implementation of part number assignment process. This includes but is not limited to:**
   - Obtaining clear direction from customers and Dot Hill Sales and Marketing personnel on Product configuration requirements (accessories, customization, labeling, and packaging).
   - Obtaining necessary data (drawing, specs, BOMs) from Engineering personnel and loading information in the Agile data base.
   - Forwarding information to appropriate departments to insure that parts are ordered on a timely basis and tracking orders.
   - Obtaining all necessary drawings and supporting documentation from Engineers.
   - Assisting personnel in developing and assigning part numbers and product structures.

4. **Shows an ability to provide support for administrative functions for Configuration Management.  This includes but is not limited to:**

- Assists in generating procedures and policies for technical writing and document control functions.
- Participates in Change Control Board (CCB) meetings

5. **Contributes to a positive working environment. This includes but is not limited to:**
   - Providing meaningful input at weekly customer, engineering and CCB meetings.
   - Working with others to seek solutions and resolve issues.
   - Conducting business in a professional manner in line with Dot Hill's Code of Ethics.
   - Appropriately and positively representing Dot Hill in all interactions with outside clients, vendors, or any member of the public.
   - Effectively communicating with all levels of employees at Dot Hill.
   - Accepting and completing special projects as assigned.

**Required Qualifications:**
- Requires excellent to superior organizational skills.
- Working knowledge of CAD software and applications.
- Knowledge of industry standards, as well as engineering and manufacturing processes.
- Ability to effectively interact with all levels of employees.
- Excellent oral and written communication skills.
- Ability to write and edit technical documents.

**Education and/or Experience Required:**
- A minimum 5 years experience in Configuration Management
- 1-year minimum experience with Oracle change management system
- 2-year minimum experience with Agile or similar PDM system

Dot Hill offers a comprehensive compensation package and a great team-oriented work environment. If you are looking for a challenging career opportunity, please send your resume and cover letter to: **apply@dothill.com**
