

[25 Do's and Don'ts of DNA](http://www.kuzmich4.com/Facebook/25_DNA_Tips.pdf) in finding answers to your ancestors at

http://www.kuzmich4.com/Facebook/25_DNA_Tips.pdf (reads better with the above URL)

DNA research can be a wonderful resource for filling in gaps in your family tree, but it can be quite involved and does have a learning curve. How do you avoid making common mistakes as you set out to do DNA research? [25 Do's and Don'ts of DNA](https://rootsrevealed.com/2018/11/07/25-dos-and-donts-of-dna/) by Melvin Collier

<https://rootsrevealed.com/2018/11/07/25-dos-and-donts-of-dna/> has some useful tips, from working with Ancestry trees to handling DNA matches and more. To learn more about DNA research in genealogy, from basics to the latest tools, see the DNA Project for **FamilySearch** at <https://www.thefhgguide.com/project-8-dna.html>, **Ancestry** at <https://www.thefhgguide.com/project-7-dna-an.html>, **MyHeritage** at <https://www.thefhgguide.com/project-7-dna-mh.html> or **Findmypast** at <https://www.thefhgguide.com/project-7-dna-mh.html>.

Closing Comments: never underestimate the potential of DNA Testing

BYU TV's *Relative Race* illustrates the wildest potential of linking families together with lost individuals over generations. Adopted children can face very awkward situations of who they are? Previous Facebook posting of December 17, 202 clearly illustrates this fact over 8 seasons with ten multi-episodes for each season. This posting is entitled: **"Give the Gift of Family History with DNA, family history and more candid excitement"** at <http://www.kuzmich4.com/Facebook/Relative%20Race.pdf> is an excellent presentation for viewing the full potential of DNA testing in one's family history endeavors. Strongly suggest you view their Season 5 with their very first episode for such startling evidence that is very possible in the 21st century world of genealogy and just the first 24 minutes of this broadcast will melt away any hesitation you might have had previously. And if that doesn't do it? At the 35 minute mark, the red team meets her brother. And when asked if there are any other siblings, he calmly says, **"four brother, four sisters and then a twin brother all from the same mother!!!"** **How's that for a real eye opener?**

Still need more inspiration and insight about DNA and all of its 21st century advantages, click on these Facebook group's previously posted links below for more DNA insight and how it may help for your particular situations.
