

General Conference Developments: Shanghai China Temple and Much, Much More!

When the general authorities stated that this conference was going to be Memorable, do take them seriously. Eight new temples were announced including one in Bahía Blanca, Argentina, Tallahassee, Florida, Lubumbashi, Democratic Republic of the Congo, Pittsburgh, Pennsylvania, Benin City, Nigeria, Syracuse, Utah, Dubai, United Arab Emirates and Shanghai, People's Republic of China

Rector scale at my house was much higher than any earthquake ever recorded on earth!!!! My daughter in Utah 400+ miles away literally felt it instantly. The general authority talks were all outstanding, but the Sunday morning ones by Gerrit W. Gong, David A. Bedard and Henry B. Eyring are ones you need to listen to first for temple and family history importance besides the closing comments on Sunday afternoon by President Russel M. Nelson when he announced the new temples. For the latest 2019 overview of Church temples, go to YouTube and search on "World Report 2020". There you can view a detailed video report at the 28.07 minute mark to the 35.17 mark for the latest overview for 2020 temple developments.

Don't miss this historic document: THE RESTORATION OF THE FULNESS OF THE GOSPEL OF JESUS CHRIST:

- [A BICENTENNIAL PROCLAMATION TO THE WORLD](#)

The closing hymn was equally as spectacular with the Tabernacle Choir on Temple Square with supporting choirs in Brazil, Ganda, South Korea, Mexico, New Zealand, and Germany, all singing together on the three verses of "We Thank Thee, O God, for a Prophet." What an appropriate way to end two days of a World Church Conference.

To conveniently peruse all the General Conference talks, go to:

<https://www.churchofjesuschrist.org/general-conference?lang=eng>. Don't miss the **Hosana Shout** with an excellent explanation for its historic importance.

Closing Comment

Brevity is the soul of wit to quote **William Shakespeare**. To succinctly quote my son, "**The world just got put on notice.**"
