Closing Comments with long-term memory benefits!

I studied privately with Lisa Louise Cooke in 2012 to learn how to construct "Google Maps" and she left a positive, permanent impression on me for family history. To see an example of a personal memory project about what I learned from Lisa, go to <http://www.kuzmich4.com/GoogleEarth/Eastern%20European%20Family%20Roots.mp4> for a 9:54 minutes video synopsis of my Eastern European Roots which is a very informative, step-by-step presentation with maps, photos and explanations of how I researched my very challenged "Roots" from ground zero to spectacular results. Here is but one video to illustrate the success in 2:19 minutes with my Ukrainian relatives in 1998 at <https://www.forever.com/app/users/roslyn-kuzmich/albums/ukraine--1/>. Note this family line was completely missing for 100 years between 1898 to 1998!!! But now no more as I sponsored their niece to immigrate to the USA to attend Red Rocks Community and she now lives in Thornton married with three sons.
